

**SUMMARY OF THE FOLLOWING  
LAMP MANUFACTURER'S INSTRUCTIONS  
LISTED BELOW**

- Only use the lamp manufactured by the gel polish manufacturer you have chosen to wear.
- Using gels not formulated to cure in a LED lamp may result in a feeling of intense heat.
- Using gels not formulated to cure in an UV lamp may result in a feeling of intense heat.
- In some cases, this may result in a severe chemical burn.
- If you have a photosensitivity, you must shield your skin or not use the lamp.
- You may or may not realize you have a sensitivity.
- Damage that may occur from the UVA light can be accelerated with exposure if a sensitivity exists. (Certain cosmetics, perfumes, oral contraceptives, acne medicine) all may cause a sensitivity.
- Stated curing times **MUST** be followed.
- Do not overexpose the nails or the skin to the LED light. This occurs when the curing times are not followed.
- For a comprehensive list of the correct curing times for many of the most popular gel polishes, consult our "Guide To The Perfect Cure" found on our website.
